

Unify and Simplify Your Business from the Cloud

What is Cisco Meraki?

Ideal for SMBs, Cisco Meraki is a complete out-of-the-box, secure network management solution with no extra hardware, software or complexity. Your portfolio of networking devices is centrally managed on the cloud, allowing you to securely manage your infrastructure with minimal difficulty and maximum cost efficiency.

Why Should I Move My Network to the Cloud?

Cloud networking should transform, not just replace, and that's just what Cisco Meraki does. Touted as the Industry's most powerful cloud-managed solution, Cisco Meraki networking product portfolio has exceptionally robust hardware to handle all the devices and applications currently on your network without needing outdated, energy-sucking, spaghetti-cable, freight-train-sounding server "boxes". Cloud-managed networking helps to simplify with improved scalability for more devices, speedy new feature activation, easy yet secure mobile device management, and most notably – remote WLAN management.

What sets Meraki apart?

It's extremely powerful, yet cleverly elegant. In fact, comparing Cisco Meraki with other Firewall appliances is a night and day difference. You'll be able to increase security, uptime, performance, and management in what seems to be a near tenfold increase.

"Cloud computing is projected to increase from \$67B in 2015 to \$162B in 2020, with a compound annual growth rate of 19%."

Gartner

"Worldwide public cloud services market will grow 18% in 2017 to \$246.8B, up from \$209.2B in 2016."

How does Cisco Meraki Help SMBs?

Streamlining and securing infrastructure without compromising effectiveness and saving money are often identified as the highest priorities for most SMBs. The cloud-managed benefits of Cisco Meraki make it a perfect fit with these benefits:

- **Simplified IT:** Manage the entire network across different locations from a single dashboard
- **Real time support:** From first network deployment to troubleshooting network issues, Cisco support engineers are available at no additional cost
- **Full Visibility:** Control users, applications and devices within the infrastructure
- **On-Demand Scalability:** Scales from small sites to million-user deployments as needed
- **End-to End Protection:** Secure (PCI and HIPAA-compliant) cloud infrastructure

"74% of CFOs say cloud computing will have the most measurable impact on their business in 2017."

Gartner

Cisco Meraki has been proven as best-in-class in mission critical, large-scale, and security conscious customer deployments. Contact us today so we can discuss the next steps in implementing Cloud Configuration with Cisco Meraki in your organization!
