

E-Rate 2.0

Filling in
the remaining
technology gaps
found in today's
education
institutions

What our wireless solutions can provide for your school:

Education goes outside the classroom.

Properly positioned access points can even provide wireless coverage outdoors, providing further opportunities to incorporate the Internet into science, physics and other curricula that benefit from experiments and observation outside the classroom.

Preparing your students for the future.

Working with mobile devices will not only be a part of their everyday lives as adults, but it will also be vital part of many career paths. Knowing how to appropriately use mobile devices is an important aspect in this increasingly connected world. In order to properly prepare your students for the future as they transition into the workforce, incorporating mobile technology in the classroom is key.

Keep applications and connections well managed and secure.

Does your school wireless network have the ability to create a separate policy that identifies student devices, giving them different access rules or web filtering? Next generation security gives administrators visibility to see what is being used on your network like social sharing and learning apps.

Big changes to the FCC's program is causing a large shift – Huge demand AND support for schools and library's wireless connectivity. There are billions of dollars up for grabs, capitalize on this opportunity and give your students the 21st century learning environment they deserve.

What to know about E-Rates as it applies to your institution.

The E-Rate program is a vital source of assistance in maintaining Internet connectivity, bringing new learning opportunities to special education students, and enhancing distance learning in rural areas.

The funding is needed to ensure that schools can match the technology tools in today's workplace, so that students can be prepared for success in life after school.

Open up access to enhanced teaching and learning resources and capabilities for your educators. **Let us help you upgrade your classrooms to not only meet the requirements put forth by E-Rates, but give your students the best tools for success.**
