

A Smarter Way to Deliver Learning

A generation ago, "technology in the classroom" consisted of a separate computer lab or maybe a desktop or two at the back of the room. Today, the entire classroom has been transformed into a 1:1 learning environment, where learning is enabled anywhere, anytime - at home, in class, after wrestling or softball practice, on the bus or whenever. Teachers can see in real time who has a firm grasp of the concepts and who doesn't. Memorization has given way to a tailored, technology-driven and more interactive approach to learning.

Lenovo Leads in Education

We have proven experience in helping schools implement Lenovo technology solutions needed to achieve operational excellence. Lenovo builds rugged and reliable hardware specifically designed for education that enable you to focus attention where it really belongs; on teaching and learning.

- Innovative, student-ready durability features like rubber bumpers and reinforced corners, hinges and ports.
- Spill-resistant keyboards and scratch resistant displays.
- Student-ready features and components.
- Active protection system that guards hard drives to keep student devices and data safer.
- Low repair rates backed up superior warranty options.

Technology that is Ready Anytime, Anywhere

Downtime is costly, measured in both dollars and lost opportunities for teaching and learning. Lenovo devices are designed specifically for frequent use and long hours in and out of the classroom, delivering rock-solid reliability that give schools productivity and peace of mind.
