

# WINDOWS DEVICES FOR EDUCATION

Students and teachers demand a lot from their devices: long battery life, durability for multiple years, and the power of a desktop with the mobility of a tablet. Fortunately, with brands like Lenovo, HP, Asus, and Acer, schools are able to find devices that offer the feature sets they need at a price they can afford.

Setting up and managing these machines can be trying, even for the most experienced IT admin. However, with Microsoft 365 Education, you can set up a classroom or entire school through a simple web interface in minutes. You can simplify the process even more by selecting apps from the Microsoft Store for Education to be preloaded on each device before deployment.

Plus with Microsoft 365 for Education, you'll have the opportunity to take your school's security to the next level. Microsoft 365 is packed with a comprehensive security suite typically available only for enterprises, yet is designed to be simple to configure and deploy regardless of organization size.

**Students thrive when they have access to personalized learning tools that spark creativity!** Windows devices are built to be the perfect match to ignite creativity in a K-12 environment with tools like these:

#### **Intune for Education:**

Allows IT administrators to quickly set up policies to help manage the devices on their network, including preloading WiFi credentials to simplify teacher and student access.

#### **Windows Autopilot:**

Saves your IT from loading a new image on new PCs ever again by facilitating the installation and configuration of approved software and system settings.

#### **Accessibility Features:**

Like narrator, word prediction and eye control help students break down the walls that can prevent them from learning.

#### **STEM/STEAM Applications:**

With apps like Minecraft for Education, students can explore while teachers get access to lesson plans from other teachers already using this technology in their classrooms.

#### **Collaboration:**

Windows devices can easily connect with each other so students can work together on projects and update their teachers in real time.

**Contact us today to get your school set up with new Windows devices and/or Microsoft 365 for Education to help propel your students to the front of the class!**
