Save Money, Increase Productivity and Work More Securely

 Windows 10 Pro

Why make the move to Windows 10 Pro?

You'll get the familiar yet improved desktop and Start Menus as well as all-new features, such as the Cortana personal digital assistant, Live Tiles, Tablet Mode, OneDrive cloud storage integration, improved support for touch, pen and voice and so much more. More importantly, you'll get hardware and software enabled features that help protect device and company information from ever- evolving security threats.

More than just software

If you run Windows 10 on your current devices, you are missing all the benefits and features that Windows 10 has to offer. There are performance and cost advantages to implementing new devices rather than just upgrading the operating system.

A new device with the appropriate hardware features will also enable you take better advantage of touch-and-pen-friendly Windows 10 including features such as Windows Hello and Cortana personal digital assistant.
